

Table of Contents

The Extrusion Press Maintenance Manual

Introduction, Acknowledgments, and References

Chapters:

Routine Inspection and Maintenance

Scheduled Maintenance	1-1
Mechanical Maintenance	1-4
Lubrication	1-8
“Preventive Maintenance Program Recommendations” (The Voice of Experience), by David Turnipseed	1-9
Daily Check Sheet Procedure	1-12
Daily Check Sheet (Sample)	1-16
Press Troubleshooting Chart	1-17
“Extrusion Press Maintenance – A Predictive Approach” (The Voice of Experience) by P. Gopalan Kutty, Gulf Extrusions, Dubai	1-24
Farrel Maintenance Training Course information:	
Press Installation	1-30
Mechanical Functions of an Extrusion Press	1-36
Mechanical Maintenance	1-39

Press Alignment	2-1
Alignment Procedures	2-3
Recommended Tools	2-3
Alignment and Leveling of the Fixed Press Components	2-6
Alignment of the Moving Press Components	2-8
Use of the Alignment Tool Stack	2-11
Quick Checks of Press Alignment	2-13
Modifying the Press for Easier Adjustment of Alignment	2-15
“Extrusion Press Alignment with Modern Technology,” by J.E.V. Mulder and G.J. Smith, University of Otago, New Zealand	2-17

Tooling

Fixed Dummy Blocks	3-1
Loose Dummy Blocks	3-4
Clean-out Blocks	3-4
Stem	3-5
Container	3-7
Container Liner	3-9
Recent Improvements in Container Design	3-10
Development of a Thermally Stable Container	3-12
“Extrusion Container Care and Maintenance,” by James M. Pope, Special Projects Consultant to Lake Park Tool	3-13
Container Life and Relining Frequency	3-17
“Preventive Maintenance of Extrusion Tooling,” by Gary Dion, Extrusion Consultant	3-19
Minimizing the Occurrence of Flared Billets	3-23
“Lubrication of Extrusion Press Tooling” by James Dyla, Amcol Corp	3-27

Inspecting and Repairing Major Components	4-1
Procedure for Repairing Cracked Main Cylinder	4-3
How Major Components are Designed and Tested	4-5
“Adapting Extrusion Presses for a High Cycle Fatigue Load Environment,” by J.O. Nøkleby, Det Norske Veritas	4-7
In-Service Inspection, Repair, and Trouble-Shooting	4-10
Failed Components – Repair or Replace?	4-12
Requirements for Replacement Components	4-13
“Catastrophic Failure: A 48 Hour Remedy,” by Rick Colden and Adam Cramlet, Alexandria Extrusion	4-17

Hydraulic Equipment	5-1
Hydraulic Oil.....	5-1
Filtration.....	5-5
Temperature.....	5-5
Sampling & Analysis.....	5-6
Air Breather.....	5-6
Pumps.....	5-6
Valves.....	5-8
Piping.....	5-8
Pressure Gauges.....	5-9
System Documentation.....	5-9
Troubleshooting.....	5-10
<i>“Proper System Maintenance to Avoid Contamination and Cavitation,”</i> by Jack Hayes, Oilgear.....	5-14
Farrel Maintenance Training Course information:	
Hydraulic Maintenance.....	5-22
Right and Wrong Ways to Install Hydraulic Tubing and Fittings.....	5-24
Troubleshooting Hydraulic Problems.....	5-26
Glossary of Hydraulic Terms.....	5-30
ISO/CETOP Hydraulic Symbols.....	5-34
Oilgear Training Bulletins:	
Hydraulic System Survival Techniques #90012.....	5-38
Filtration Recommendations #90007-D.....	5-42
Piping Information #90011-F.....	5-50
Resistance of Valves and Fittings to Flow of Fluids.....	5-54
Storage Recommendations #90006B.....	5-55
Electrical & Controls	6-1
Maintenance of Control Equipment.....	6-3
Container Heating.....	6-6
Electric Motors.....	6-6
<i>“Extrusion Press Electrical Systems,”</i> by David Turnipseed.....	6-10
<i>“Tips for Successful Electrical Trouble Shooting of Extrusion Equipment,”</i> by David Turnipseed.....	6-15
Billet & Log Infeed Systems	
Billet/Log Infeed Conveyors.....	7-1
Billet/Log Heaters - Gas Fired.....	7-3
Refractory and Insulation.....	7-4
Thermocouple Probes.....	7-4
Combustion Systems.....	7-9
Billet Heaters - Induction.....	7-28
Log Shear.....	7-30
Log Saw.....	7-32
Billet Transfer Conveyor.....	7-33
Billet Lubrication.....	7-34
Profile Handling Systems	
High Temperature Textile Materials.....	8-2
Lead-out Tables.....	8-4
Run-Out Conveyors.....	8-5
Water Quench Systems.....	8-9
Air Quench Systems.....	8-11
Saws and Shears for Hot Profile Cut-Off.....	8-13
Pullers.....	8-18
Profile Transfer Systems and Lift-Overs.....	8-22
Cooling Tables:	
Walking Beams.....	8-25
Belt Conveyors.....	8-27
Stretchers.....	8-29
Saw Feed Conveyors.....	8-32
Finish or Cold Saws.....	8-34
Saw Blade Lubrication.....	8-37
Saw Length Gauges.....	8-42

Off-Load Conveyors	8-44
Profile Stackers	8-45
Age Ovens	9-1
Temperature Surveys	9-1
Basic Age Oven Configurations.....	9-3
Combustion Systems	9-6
Routine Combustion System Maintenance.....	9-20
Improving Age Oven Energy Efficiency	9-22
<i>"The Ageing Process for Extruded Aluminum Profiles,"</i> paper by Al Kennedy	9-23
Die Ovens	10-1
Maintenance Schedules	A-1
When to Perform Extrusion Plant Maintenance.....	A-2
Master Maintenance Schedule	A-5
Daily Maintenance	A-19
Weekly Maintenance	A-22
Monthly Maintenance	A-24
Quarterly Maintenance	A-28
Six Months Maintenance	A-29
Annual Maintenance.....	A-30
Spare Parts	
Recommended Spare Parts	B-1
Storage of Spare Parts	B-11
Modernizing Older Presses	C-1
Specifying a New Press.....	C-5
Modernizing the Press Feed Line.....	C-9
Modernizing the Handling System.....	C-13
Downstream Material Handling	C-17
Auxiliary Equipment.....	C-17
Vendor Request form for Press Upgrades.....	C-19
<i>"The Extrusion Press Line for 2024: A Forecast,"</i> by Al Kennedy.....	C-21
Double-Length Run-out Systems	C-30
Safety & Environment	D-1
Extrusion Tooling Safety.....	D-2
Safe Lifting Techniques.....	D-5
Mechanical Press Equipment	D-6
Keeping Overhead Cranes Safe.....	D-7
Check List of Safety Hazards	D-9
Personal Protective Equipment	D-12
Lock-Out Tag-out Procedures	D-14
Environment	D-16
Managing Extrusion Plant Maintenance	E-1
The Maintenance Level Audit	E-1
Staffing and Required Skills	E-4
Maintenance Engineering.....	E-5
Equipment Information Files and History.....	E-5
Spare Parts Inventory.....	E-6
<i>"High-Tech Tools for Extrusion Plant Maintenance,"</i> by Al Kennedy	E-9
Useful Tables:	
Conversion of Units	x
Temperature Conversion.....	xii
Calculating Stretcher Capacity – English Units	xiii
Calculating Stretcher Capacity – Metric Units	xiv
Weight of Extrusion Billets.....	xv
Press Specific Pressure – English Units.....	xvi
Press Specific Pressure – Metric Units	xvii
Millimeter Conversion	xviii
Time Limits for Tooling in Oven at Temperature	xix
Thermocouple Types.....	xix
Glossary of Terms for Press Components.....	xx
Diagrams of Press Components.....	xxii
